

ALLERGEN IDENTIFICATION AND HANDLING PROCEDURES – ELI'S BREAD

- **Identify an ingredient as containing an allergen component**
- **All cases of this product must be specially tagged at time of receipt with a florescent dot.**
- **All cases of this product must be strictly tracked by lot number.**
- **This product must be segregated in both storage and make-up areas to further highlight the fact that it is a sensitive product and must be handled with care.**
- **Dough using these ingredients must be prepared last in the production process to protect against possible cross-contamination.**
- **All production equipment must be thoroughly cleaned and sanitized before the next cycle of production can be run to prevent cross contamination.**
- **All products will be packed and shipped in separate bags or boxes respectively to prevent cross contamination.**
